

# Plant Parts

Draw, label and summarize the role of each plant part: Roots, Stem, Leaves, Flower, Fruit, Seed

(Example plant, can be any plant found in Ireland.)

# Seeds

Embryos for a new plant.
Animals, wind, or water can carry the seeds to a new environment

# Fruit

Ripened ovules where the seeds are contained

# Flower

The reproductive unit of most plants where seeds are created

# Leaves

Food for plant is made through photosynthesis, using light, water, chlorophyll and carbon dioxide to make glucose or sugar

# Stem

Carry nutrients to the rest of the plant; supports to plant

# **Roots**

Anchors plant to the ground; absorbs and stores nutrients to feed the plant

# **Plant Name**

Strawberry
